

ENVIRONMENTAL POLICY

"Our choices at all levels—individual, community, corporate and government—affect nature. And they affect us."

David Suzuki

Trigg Brothers are committed to leading the UK metal recycling industry in minimizing the impact its activities have on the environment.

The key points of our strategy to achieve this are:

- Minimize waste by evaluating our operations and ensuring they are as efficient as possible.
- Minimize toxic omissions through the selection and use of its fleet and the source of its power requirement.
- Actively promote smart waste management and recycling both internally and amongst our customers and suppliers.
- Source and promote a product range that minimizes the environmental impact of both waste metal collection and recycling.
- Meet or exceed all the environmental legislation that relates to Trigg Brothers work activities.

Our Commitment to the environment

Industry within the UK and EU are increasingly becoming aware of the need to improve how it handles its waste metals and alloys. The task of clearing metal waste from works sites has long been associated with being a dirty business. Trigg Brothers seeks to improve this image through the use of our comprehensive waste management package that includes advice to customers on sorting metals, the siting of containers that adhere to all industry regulations and ensure minimal impact to the environment, sealed containers for waste metals and waste products that are contaminated with harmful substances.

Trigg Brothers are actively committed to seeking out ways to reduce the amount of waste from its customers entering landfill sites or being onwardly processed for incineration.

Trigg Brothers are committed to managing correctly all of the waste products we deal in and ensure that after they leave a customer they have the minimum impact possible on the environment.
